

# Paige Maggio

## Frontend Engineer | React, TypeScript, Next.js

linkedin.com/in/paigemaggio | github.com/pmaggio15 | 253-294-4205 | pmaggio15@gmail.com | paigemaggio.dev |

## Experience

### Frontend Engineer | Skinstric | [Live Demo](#) | [GitHub Link](#)

Sep - Oct 2025

- Built skin analysis prototype in 1 week (50% faster than deadline) to demonstrate AI powered skincare recommendations, integrating third party analysis API with asynchronous state management and mobile responsive interface
- Built modular component system using React, TypeScript, and Tailwind CSS for dynamic skincare recommendation displays with reusable UI patterns
- Implemented real time image capture and upload workflows with structured error handling for API requests and response validation
- Engineered multi step analysis interface with loading states and smooth UI transitions using Next.js, optimizing user experience across devices

### Frontend Engineering Intern | Frontend Simplified | [Live Demo](#) | [GitHub Link](#)

Aug - Sep 2025

- Extended React analytics dashboard implementing secure routing, role based access control, and reusable component layouts using JavaScript and TypeScript
- Integrated REST APIs to fetch and render dynamic data with loading states, pagination, and responsive design across devices
- Built modular, well tested React components following consistent UI patterns and component architecture best practices
- Collaborated in Agile environment using Git workflows with feature branches, pull requests, and code reviews

### Club Administrator & Tournament Director | Glacier Surf Soccer Club

Nov 2023 - July 2025

- Built and maintained club website serving 200+ families for tournament registration and event coordination
- Managed operations for 15+ teams with \$300K annual budget, directing tournaments generating \$115,000 in revenue with 7,500 attendees

## Projects

### NueraFlow AI | [Live Demo](#) | [Github Link](#)

Oct - Nov 2025

- Built AI productivity platform addressing document overload in knowledge work, implementing Node.js/Express backend with JWT authentication, RESTful API endpoints, and MongoDB database for intelligent document summarization and search
- Integrated OpenAI APIs on backend for document summarization and search, handling streaming responses with async state management and structured data transformation
- Developed React/Next.js frontend with TypeScript consuming custom API endpoints, implementing real time document processing interface with Tailwind CSS and performance optimized rendering
- Designed database schema with proper indexing strategies for efficient document queries, supporting user specific content retrieval and search functionality

### StayMori Collection | [Live Demo](#) | [GitHub Link](#)

Jun - Jul 2025

- Built vacation booking platform solving double booking conflicts and checkout friction, using React, Node.js, Express, and MongoDB with real time availability validation and end to end reservation workflows
- Built REST API with real time availability filtering and date based search logic, implementing database level validation to prevent double bookings
- Integrated Stripe payments with secure checkout, user authentication, and reservation confirmation workflows
- Designed mobile first booking interface with Tailwind CSS, implementing multi step checkout flow with form validation and confirmation screens

## Education

### FES Institute - Frontend Simplified | [Certificate](#)

Mar - Dec 2025

- Professional frontend engineering program focused on React, TypeScript, JavaScript, and modern UI architecture

### University of Arizona | BS, Care, Health and Society

Aug 2013 - May 2017

- NCAA Division I Varsity Soccer Athlete balancing 20+ hours/week training with full academic course load

## Technical Skills

**Programming Languages:** TypeScript, JavaScript, HTML, CSS

**Frameworks & Libraries:** React, Next.js, Redux, React Query, Zustand, Tailwind CSS

**Tools & Platforms:** GitHub, Vite, Vercel, Firebase, MongoDB, Jest, Figma, VS Code
